**Subject:** sampling

Hi All,

Dan Wall, with the help of all of you, has determined we will do our extra sampling every week through March and April at A55 Howardsville, A56 Above Arrastra, Arrastra, near T4 (Kimball reference), Lackawanna Bridge (nonbridge), and A68. Thanks so much for your input.

We are set for sampling for Riverwatch this Friday, but I am waiting to commit to going to A72 until I see how things are with avalanche danger on Friday. A72 is safe until you start talking about conditions like we have today. Large, destructive slides coming down. So the lowest Silverton area site for this month may be "Above A72" for Riverwatch data. Just a heads up, Peter!

This uncertainty has made me plan to start the extra March/April sampling Monday next week rather than this week. Let things settle down out there.

Thanks.
